

Donating HERE is as **rewarding** as EVER.

AND NOW IT'S EVEN EASIER.

At Children's Hospital Boston, our commitment to being one of the country's premier centers for pediatric care extends to every area of our organization. The addition of DonorDoc and El Dorado Donor technology to our Blood Donation Center now makes the process even more streamlined.

Children's Hospital Boston
BLOOD DONOR CENTER

give pints for half-pints

SIMPLE STEPS TO FOLLOW:

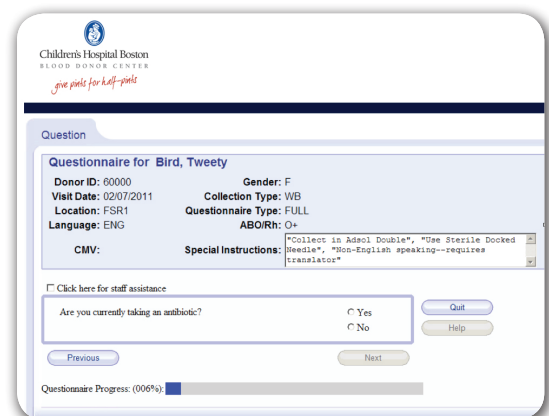

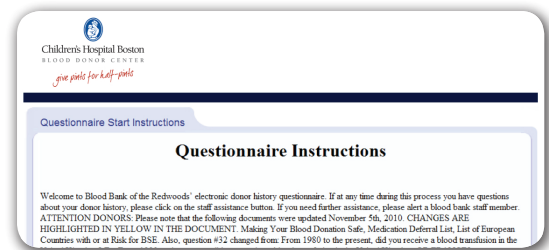

1 Check in at the desk, where you'll be asked for an ID and to complete some information that we will use to enter you into our system, or to verify against your previous information.

2 Begin by reading the onscreen **donor history questionnaire instructions**. You can ask for assistance at any time by flagging any question/answer you're unsure of.

3 Follow the **onscreen prompts** to move from screen to screen. The bottom **progress bar** indicates where you are in the questionnaire process.

4 Shortly after completing the donor history questionnaire, you'll be called into a private and confidential setting for your **history interview** — which includes a final review of your questionnaire to ensure accuracy.

5 You'll then be asked to provide a **digital signature** on the donor history questionnaire.

You're now ready to move onto the **donation/collection process!**
