

David Roman writes small interviews for the *SBS News* – light pieces that show the "off- hours side" of professionals in your field. In other words, any interesting *hobbies or avocations that show the non-laboratory hours of scientists*. Some interviews have included: a certified chef, a Tae Kwon Do instructor, a beer brewer, a horse jumping enthusiast, a rock/mineral collector, mountain climbers, and a drum player for a rock band.

Do you have any such **outside interests** that you would like to share with me and the SBS Membership? If so, it would only take about 1/2 hour of your time. David records the interview, transcribes and edits, and then emails it back to you for final approval.

If this interests you, please contact David Roman at DRoman@sbsonline.org .
