Patient Name:

Date of Birth:

Reason for DXA: _____

Diagnosis (select from following list): _____

Previous DXA Scan at BCH:	Yes	No
Does Patient Require Oxygen:	Yes	No
Does Patient have a Ventilator:	Yes	No
Is Mobility Assistance Needed:	Yes	No
Does Patient have Orthopedic Hardware:	Yes	No
Orthopedic hardware location?	_____	
Is prescribed estrogen/testosterone?	E. <input type="checkbox"/>	T. <input type="checkbox"/> None <input type="checkbox"/>

- Appt scheduled through referring clinic
 - Patient/Family will call to schedule
 - DXA Center should call to schedule
- Phone Number _____

Examination Requested:

STANDARD EXAMINATION (please check a box below)

Initial DXA scan at BCH, no spine or hip hardware

- 4-15 years old: total body and spine
- 16 years old or older: hip and spine
- Body Composition

Prior DXA scan at BCH, no spine or hip hardware

- 4-15 years old: total body and spine
- One-time transition for patients with prior "4-15 years old TB/spine" → now "16+ years old Hip/Spine": total body, spine, hip
- 16 years old or older: hip and spine
- Body Composition

SPECIAL CIRCUMSTANCES:

If unable to obtain standard scans (due to hardware, inability to hold still, etc.), consider the following in children >4 years, with a goal to obtain two sites:

- Hip (unless hip hardware is present) and either...
- Distal lateral femur
- Forearm

NOTE: Height-adjusted Z-scores will be provided for patients <5th %ile

Bone Age Adjustment - Only if concerned for delayed bone age without short stature, consider requesting a bone age adjusted DXA. There are more accurate normative data for height adjusted DXA scans.

Results will be sent to referring physician within 7 -10 days
