

Boston Children's Hospital and Harvard Medical School The Translational Post-Doctoral Training Program in Neurodevelopment (Neurodevelopmental T32 Fellowship)

Program Description

Two-year postdoctoral fellowships funded by the National Institute of Mental Health (NIMH) are available for researchers who seek to improve or expand their ability to conduct interdisciplinary, translational neuroscience research in neurodevelopment and neurodevelopmental or mental disorders.

Research Areas

Postdoctoral projects can encompass basic and/or clinical research and might include investigation into one or more of the following areas:

- ❖ Developmental psychopathology
- ❖ Interventional studies
- ❖ Molecular or behavioral neurogenetics
- ❖ Neuroimaging
- ❖ Neurobiology
- ❖ New diagnostic methods
- ❖ Outcomes research

Program Areas/Faculty Department Affiliations

Fellows with MD or PhD degrees conduct research during the program with mentors/advisors from the following areas:

- ❖ Computer Science
- ❖ Developmental/Behavioral Pediatrics
- ❖ Genetics
- ❖ Neurology
- ❖ Neurobiology
- ❖ Neuroradiology
- ❖ Neuroscience
- ❖ Neurosurgery
- ❖ Psychiatry and Behavioral Sciences
- ❖ Psychology

Trainee Program

This two-year training program provides trainees with the essential guidance, training, and mentoring critical to launching an independent career in academic research. The training program starts by recruiting the most talented trainees from MD/PhD, MD, and PhD programs who are interested in pursuing a career in translational neuroscience research and academia. Close interaction between T32 mentors and trainees are supplemented by a structured training program that provides a common knowledge base with respect to translational neuroscience research. Supplemental work will focus on Translational Neuroscience Seminar Series and Proseminars complemented by trainee specific coursework. Administratively, the program consists of co-directors (Drs. Nelson & Glahn) and a group of 19 highly skilled and successful training faculty from diverse array of disciplines.

How to Apply

Applicants should first consult the list of potential mentors and confirm that he/she is willing to serve as primary mentor. Eligible candidates should submit one PDF via email to T32translationaldevelopment@childrens.harvard.edu with the following documents: **(1) trainee's CV, (2) trainee's research statement (max 2 pages) about research interest and specifically why they have selected this training program, and (3) names and contact information of 2 potential letter writers.** Project proposals should clearly state the interdisciplinary nature of the project. *If selected for an interview, we will also require: (4) 2 letters of support (one from trainee's mentor) and (5) mentor's NIH other support document.*

Applications should be submitted by **March 14, 2025**, with the expectation that trainees will be selected by **April 30** and will start as early as **July 2025**. Applicants must be U.S. citizens or permanent residents with an MD and/or PhD (must be completed at the time training begins). Commitment to the goals of the program and strong academic and research credentials are important criteria used in the selection process.

Further inquiries can be made by reaching out to us directly at T32Translationaldevelopment@childrens.harvard.edu.

Faculty Mentors

Mentor Name/Degree Affiliation	Rank	Primary (& Secondary) Appointment(s)	Research Interest
<u>Anne Arnett, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Assistant Professor	Developmental Medicine, Pediatrics	Neurodevelopmental Disorders, Brain- based biomarkers, ADHD
<u>Mark Bear, PhD</u> <i>MIT</i>	Professor	Brain and Cognitive Sciences	Neuroscience
<u>Michelle Bosquet Enlow, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Associate Professor	Psychiatry	Neurodevelopmental Disorders
<u>Stacy Drury, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor and Chair	Psychiatry	Neuropsychiatric Genetics

<u>Susan Faja, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Associate Professor	Pediatrics and Psychology in Psychiatry	Neurodevelopmental Disorders
<u>Brielle Ferguson, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Assistant Professor	Genetics and Genomics	Biomarkers of cognitive function
<u>John Gabrieli, PhD</u> <i>MIT, Harvard Medical School</i>	Professor	Brain and Cognitive Sciences	Cognitive Neuroscience
<u>David Glahn, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Psychiatry	Neuropsychiatric Genetics, Affective and Psychotic Disorders
<u>P Ellen Grant, MD, MSc</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Radiology and Pediatrics	Fetal-Neonatal Neuroimaging and Developmental Science
<u>Takao Hensch, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Neurology	Development of Neural Circuits
<u>Maria Jalbrzikowski</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Assistant Professor	Psychiatry	Neuroimaging-based markers of psychosis risk
<u>April Levin, MD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Associate Professor	Neurology	Neurodevelopmental disorders, EEG, sensory processing
<u>Jonathan Lipton, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Assistant Professor	Neurology	Neurodevelopment and Circadian Rhythms
<u>Charles A. Nelson, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Pediatrics and Neuroscience, Psychology in Psychiatry	Developmental Cognitive Neuroscience
<u>Alexander Rotenberg, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Neurology	Brain Injury and Epilepsy
<u>Mustafa Sahin, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Neurology, Neurobiology	Neurodevelopmental Disorders, Neuronal Connectivity
<u>Beth Stevens, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Associate Professor	Neurology	Synapses, Neuron-glia and Neural-immune Interactions

<u>Mriganka Sur, PhD</u> <i>MIT</i>	Professor	Brain and Cognitive Sciences	Learning and Memory
<u>Christopher Walsh, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Professor	Pediatrics and Neurology, Genetics and Genomics	Neurodevelopmental Disorders, Brain Development, Evolution, and Function
<u>Carol Wilkinson, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Assistant Professor	Developmental Medicine, Pediatrics	Neurodevelopmental disorders, Early brain development, Brain-based biomarkers
<u>Timothy Yu, MD, PhD</u> <i>Harvard Medical School, Boston Children's Hospital</i>	Associate Professor	Genetics and Genomics	Neurodevelopmental and Neurogenetic Diseases
